Overview Route Database

As the title suggests, this database provides an overview of the current status of the EuroVelo network. It is an administrative tool and so the sections shown only give an indication of the line of the routes and do not provide the exact locations. If you would like detailed information in order to cycle the routes please contact our [National EuroVelo Coordination Centres and Coordinators \(NECC/Cs\)](#).

We will be working with the NECC/Cs and other project partners in the coming months to gather data on each section of the EuroVelo network.
