Introduction

EuroVelo is the European cycle route network – a network of 16 long distance cycle routes that connect the whole continent.

Founded in 1995, the routes can be used by long-distance cycle tourists, as well as by local people making daily journeys.

The network is developed and coordinated by the European Cyclists’ Federation (ECF) on the European level with a network of National EuroVelo Coordination Centres working to realise the routes on the ground.
Cycle tourism is booming

According to a 2012 study commissioned by the European Parliament, there are an estimated 2.3 billion cycle tourism trips in Europe every year, of which 20.4 million include at least one overnight stay.

The study found that the average direct expenditure for multi-day cycle trips is just under €440 per person, per trip. In total, cycle tourism has a value in excess of €44 billion, which is higher than the European cruise ship industry.

The study estimated that when complete, the EuroVelo network alone will generate 60 million trips creating a total of €7 billion of direct revenue.

Investing in EuroVelo

The routes that make up the network incorporate some of the most attractive and popular that the continent has to offer. Routes such as the Loire à vélo in France and the Danube Cycle Path through parts of Germany, Austria, Slovakia and Hungary.

EuroVelo provides a gateway for anyone wanting to cycle in Europe. The two main communication and promotional tools are the EuroVelo.com website and the EuroVelo Overview Map.
